ASCO Line Safety Assembly

Whenever an ASCO CO₂ evaporator or tank is installed, a line safety device must be added in case liquid CO₂ becomes trapped in a section of piping. In this event, the safety valve will activate to prevent damage to the piping.

ASCO Line Safety Assembly

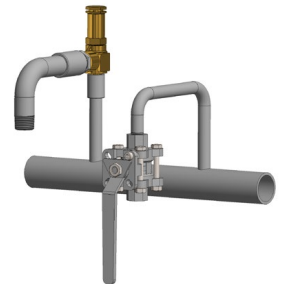

Art.-Nr. 4070042

Pos. 001

Line safety assembly 1" - 25 bar (363 psi) welding connection

Consisting of:

- stainless steel pipe 1" / DN25
- safety valve 25 bar (363 psi)
- vent ball valve stainless steel 1/4"

ASCO Line Safety Assembly

Art.-Nr. 4070044

Pos. 002

Line safety assembly 1/2" - 25 bar (363 psi) welding connection

Consisting of:

- stainless steel pipe 1/2" / DN15
- safety valve 25 bar (363 psi)
- vent ball valve stainless steel 1/4"
