

The headquarter of ASCO CARBON DIOXIDE LTD is located in Romanshorn / Switzerland and is the leading company for CO₂ and dry ice technology. We are part of Messer Group which is one of the leading international industrial gas companies with over 5'500 employees.

To support our engineering team at our production facility in Bad Hönningen / Germany we are looking for a team-minded and dedicated

Project Engineer CO₂ Plants (m/f)

Your tasks

- In collaboration with the project team, prepare tenders for plant components (fittings, equipment, installation material, etc.)
- Co-design of the technical project documentation and of engineering bills of material
- Design of installation plans for CO₂ plants
- Design of P&I diagrams based on the specifications of process engineering
- Support of the project managers and the engineering team in the context of project execution
- Technical support for purchasing
- Cooperation in the further development, improvement and standardization of systems or assemblies / packaged units

Your profil

- Degree in mechanical engineering / process engineering or state-certified technician or equivalent qualification
- Several years of professional experience in process plant engineering, preferably in the field of pipeline, fitting or mechanical engineering
- Routine handling of CAD systems
- Teamwork, flexibility, initiative and willingness to travel, as well as the willingness to continuously improve
- Very good English skills
- German skills preferable
- Based in EU

Are you used to working independently and on your own responsibility? Do you appreciate a varied and internationally oriented activity in a powerful team? If yes, then you are exactly right at ASCO. We offer an interesting and wide-ranged job in a lively company. We assure you of a comprehensive training. If you are interested in joining our team, then please send us your application by email to Mrs. Cornelia Simbürger, Head of Human Resources, cornelia.simbuenger@ascoco2.com.
