

PRESS RELEASE

The new ASCOJET 608 convinced visitors at K 2016

ASCO CARBON DIOXIDE LTD presented its expanded range of ASCOJET dry ice blasting units and thus the new ASCOJET 608 for the very first time ever at K 2016, 19 to 26 October in Duesseldorf, Germany. The new dry ice unit is the smallest and handiest in the ASCOJET portfolio.

By taking a close look at the exhibits at the ASCO booth, visitors were able to convince themselves personally of the capabilities of the entire product range of ASCOJET dry ice blasting units. Markus Erne, Sales Director Dry Ice Applications at ASCO, comments on the trade fair as follows: "We are very satisfied with the event's results: direct sales, a high number of visitors and a positive customer feedback confirmed the brisk interest in mould cleaning with dry ice. The response to our newest product ASCOJET 608 was very positive. The combination of high cleaning performance with low air consumption and the new integrated pellet grinder which allows blasting with finest dry ice particles were very well received by fairgoers."

However, ASCO's solutions not only include intensive advice in choosing the right dry ice unit. Rather it's all about providing the right amount of dry ice at the right time, the right place and above all in excellent quality to achieve optimum cleaning performances. Erne adds: "ASCO's commitment to new technologies in the field of dry ice blasting is a further important step towards completion of range for our customers. We were able to gather new ideas for future applications due to numerous discussions with fairgoers. For this reason, we would like to say thank you for the many valuable discussions and the exchange of experiences."

About ASCO

Swiss ASCO CARBON DIOXIDE LTD is a provider of complete CO₂ and dry ice solutions with customers worldwide. The product range includes CO₂ Production and CO₂ Recovery Plants, ASCOJET Dry Ice Blasting Units, Dry Ice Production Machines, CO₂ Cylinder Filling Systems, CO₂ Vaporisers, CO₂ Storage Tanks, CO₂ Dosing Systems for Water Neutralisation and various other CO₂ and dry ice equipment. Thanks to this broad product range and more than 130 years of practical experience in the wide field of CO₂ and dry ice, customers benefit from individual, complete CO₂ solutions from a single source. Since 2007 ASCO has been part of the international industrial gas enterprise Messer Group and is its competence centre for CO₂. By joining forces with the German BUSE Gastek GmbH & Co. KG, based in Bad Hönningen, in the year 2014, the expertise and product portfolio was pooled and significantly expanded. This applies in particular to the complex field of CO₂ recovery. ascoco2.com
