

PRESS RELEASE

ASCO CO₂ Plant Technology convinces at drinktec 2017

The drinktec 2017 in Munich was the hot spot for the beverage and liquid food industry. All leading manufacturers presented their latest products and technologies. Among them was ASCO CARBON DIOXIDE LTD with its modern CO₂ plant portfolio.

During the five days of the fair, ASCO was able to welcome around 120 visitors on their modern booth. Having a good piece of Swiss chocolate in a pleasant atmosphere, the ASCO sales team answered all questions concerning CO₂ plants and the economic and ecological advantages which come along with the purchase of such a system.

ASCO Managing Director Marco Pellegrino is satisfied with the participation in the trade fair: "Drinktec was a great success for us! Once again, the trade fair has shown that it is a pioneer for the beverage and brewing industry. Thanks to the many high-quality contacts, we were able to generate new business and set the course for the sale of an ASCO recovery plant for CO₂ as a by-product. Anyway, we figured out that there is a high demand for complete CO₂ solutions from a single source."

As part of the sales team, Jürg Maron, ASCO Regional Sales Director CO₂ Systems, was also on the spot all week and concluded: "We were very pleased with the many long-standing customers who have found their way to our booth. It is always enjoyable to hear when the plants sold run to the fullest satisfaction of our clients. This confirms us in our work and is motivation to offer every customer a tailor-made CO₂ solution," Maron concludes.

About ASCO

Swiss ASCO CARBON DIOXIDE LTD is a provider of complete CO₂ and dry ice solutions with customers worldwide. The product range includes CO₂ Production and CO₂ Recovery Plants, Dry Ice Blasting Units, Dry Ice Production Machines, CO₂ Cylinder Filling Systems, CO₂ Vaporisers, CO₂ Storage Tanks, CO₂ Dosing Systems for Water Neutralisation and various other CO₂ and dry ice equipment. Thanks to this broad product range and more than 130 years of practical experience in the wide field of CO₂ and dry ice, customers benefit from individual, complete CO₂ solutions from a single source. Since 2007 ASCO has been part of the international industrial gas enterprise Messer Group and is its competence centre for CO₂. By joining forces with the German BUSE Gastek GmbH & Co. KG, based in Bad Hönningen, in the year 2014, the expertise and product portfolio was pooled and significantly expanded. This applies in particular to the complex field of CO₂ recovery. In July 2016, the US subsidiary ASCO CARBON DIOXIDE INC (ASCO Inc.), based in Jacksonville/Florida, was founded. ascoco2.com
