

PRESS RELEASE

The new ASCOJET 1208 – Easy dry ice blasting

With the launch of the ASCOJET 1208, the Swiss company ASCO CARBON DIOXIDE LTD developed a compact and easy-to-handle dry ice blasting machine, which is suitable for industrial applications.

The dry ice blasting unit ASCOJET 1208 impresses with a new modern frame design and self-explanatory pictograms. The 107 lb unit is easily carried to any place, thanks to the two large fixed rear wheels, as well as two lockable small front wheels. Housing and frame are made of robust powder coated steel. The newly integrated grounding roll and the pellet hopper's protective grating help guarantee even safer handling during the dry ice blasting process. Consumption rates for average dry ice volume and blasting pressure can be easily adjusted manually.

ASCO Managing Director Marco Pellegrino is completely convinced by the new ASCO dry ice blasting machine and explains: "This high-performance machine is characterised by its lightness. Thanks to the compact design, the ASCOJET 1208 is also suitable for more delicate cleaning work. Since dry ice blasting is a corrosion-free and non-abrasive process, even sensitive surfaces can be cleaned easily. The combination of high cleaning performance and relatively low compressed air consumption is an additional bonus."

The ASCO dry ice blasting technology has been successfully used in various industries for decades. Molds, tools, and machines can be cleaned by using ASCO dry ice blasting machines. In most cases, it is not necessary to dismantle the parts to be cleaned, which ensures shorter downtime and increased productivity during operation. "At ASCO we are always striving to optimise our portfolio of dry ice blasting machines for our customers. This allows us to offer the right blasting machine for every application. The market introduction of the ASCOJET 1208 is a further step towards completion of supply," Pellegrino concludes.

About ASCO

Swiss ASCO CARBON DIOXIDE LTD is a provider of complete CO₂ and dry ice solutions with customers worldwide. The product range includes CO₂ Production and CO₂ Recovery Plants, Dry Ice Blasting Units, Dry Ice Production Machines, CO₂ Cylinder Filling Systems, CO₂ Vaporisers, CO₂ Storage Tanks, CO₂ Dosing Systems for Water Neutralisation and various other CO₂ and dry ice equipment. Thanks to this broad product range and more than 130 years of practical experience in the wide field of CO₂ and dry ice, customers benefit from individual, complete CO₂ solutions from a single source. Since 2007 ASCO has been part of the international industrial gas enterprise Messer Group and is its competence centre for CO₂. By joining forces with the German BUSE Gastek GmbH & Co. KG, based in Bad Hönningen, in the year 2014, the expertise and product portfolio was pooled and significantly expanded. This applies in particular to the complex field of CO₂ recovery. In July 2016, the US subsidiary ASCO CARBON DIOXIDE INC (ASCO Inc.), based in Jacksonville/Florida, was founded. ascoco2.com
