

PRESS RELEASE

ASCO Inc. impressed at Foam Expo with new dry ice blasting portfolio

This year's Foam Expo was all about sustainability, recycling, weight reduction and product optimization when dealing with foam products. In this context, ASCO Inc. presented their renewed range of dry ice blasting machines to an interested audience in Novi, Michigan.

The benefits and applications of dry ice blasting technology are diverse, but above all, it allows efficient, yet gentle cleaning of moulds and surfaces of all kinds. The renewed ASCO portfolio with the recently introduced blasting machines ASCO Nanojet, ASCOJET 1208 and ASCOJET 2008 Combi Pro incorporates all market needs when it comes to cleaning with dry ice.

Thomas Bearden, Regional Sales Manager, and Dan Gruber, Sr. Project Manager at ASCO Inc., are very pleased with the course of the Expo: "We've noticed a lot of interest in cleaning with dry ice. The high number of booth visitors and the promising contacts we were able to generate confirm that," says Bearden. Dan Gruber adds: "During the three days of the trade show, we were able to introduce our individual solutions in personal conversations to many attracted visitors. The lively exchange with our users is valuable to us and our team has been able to take home some helpful inputs."

Over the next few months, ASCO Inc. will participate at many trade shows in the US. The ASCO dry ice blasting technology can be seen at the Metalcasting Congress in Fort Worth (Texas), at the NPE in Orlando (Florida) and the Amerimold in Novi (Michigan).

About ASCO

Swiss ASCO CARBON DIOXIDE LTD is a provider of complete CO₂ and dry ice solutions with customers worldwide. The product range includes CO₂ Production and CO₂ Recovery Plants, Dry Ice Blasting Units, Dry Ice Production Machines, CO₂ Cylinder Filling Systems, CO₂ Vaporisers, CO₂ Storage Tanks, CO₂ Dosing Systems for Water Neutralisation and various other CO₂ and dry ice equipment. Thanks to this broad product range and more than 130 years of practical experience in the wide field of CO₂ and dry ice, customers benefit from individual, complete CO₂ solutions from a single source. Since 2007 ASCO has been part of the international industrial gas enterprise Messer Group and is its competence centre for CO₂. By joining forces with the German BUSE Gastek GmbH & Co. KG, based in Bad Hönningen, in the year 2014, the expertise and product portfolio was pooled and significantly expanded. This applies in particular to the complex field of CO₂ recovery. In July 2016, the US subsidiary ASCO CARBON DIOXIDE INC (ASCO Inc.), based in Jacksonville/Florida, was founded. ascoco2.com
