

## PRESS RELEASE

### **Messer Bosnia wins new customers with ASCO dry ice pelletizer A120P**

Until now Messer BH Gas (Bosnia) was only able to produce dry ice snow. With the new ASCO Dry Ice Pelletizer A120P the gas producer is able to produce dry ice pellets in five different sizes. In addition to the ASCO Pelletizer (production capacity: 120 kg/h / 264.6 lb/h) they have also invested in six new ASCO Dry Ice Boxes AT126. They are specially designed for the storage of dry ice and are characterized by their high insulation values.

Messer Bosnia's original customers, who could only buy dry ice snow in the past, are enthusiastic about the "new" and less sublimating dry ice pellets. With pellets as a new dry ice product, Messer BH Gas has gained new customers. Their customers use the dry ice pellets for cooling, transport and cleaning purposes. In addition, some of their customers need the dry ice pellets as a "special effect" for events.

**Admir Ibrahimović, Gas Application Engineer, Messer BH Gas** is enthusiastic: *"With the ASCO Dry Ice Pelletizer A120P we now are able to produce dry ice in different pellet sizes, which has certainly led to an increase in dry ice sales."*

Like ASCO, Messer BH Gas is a subsidiary of the Messer Group. The Messer Group is the world's largest family-run gas company. Messer has state-of-the-art research and competence centers in which applied technologies for the use of gases in almost all branches of industry, in food and environmental technology, in medicine as well as in research and science are developed.

**About ASCO**

Swiss ASCO CARBON DIOXIDE LTD is a provider of complete CO<sub>2</sub> and dry ice solutions with customers worldwide. The product range includes CO<sub>2</sub> Production and CO<sub>2</sub> Recovery Plants, Dry Ice Blasting Units, Dry Ice Production Machines, CO<sub>2</sub> Cylinder Filling Systems, CO<sub>2</sub> Vaporisers, CO<sub>2</sub> Storage Tanks, CO<sub>2</sub> Dosing Systems for Water Neutralisation and various other CO<sub>2</sub> and dry ice equipment. Thanks to this broad product range and more than 130 years of practical experience in the wide field of CO<sub>2</sub> and dry ice, customers benefit from individual, complete CO<sub>2</sub> solutions from a single source. Since 2007 ASCO has been part of the international industrial gas enterprise Messer Group and is its competence centre for CO<sub>2</sub>. By joining forces with the German BUSE Gastek GmbH & Co. KG, based in Bad Hönningen, in the year 2014, the expertise and product portfolio was pooled and significantly expanded. This applies in particular to the complex field of CO<sub>2</sub> recovery. In July 2016, the US subsidiary ASCO CARBON DIOXIDE INC (ASCO Inc.), based in Jacksonville/Florida, was founded. [ascoco2.com](http://ascoco2.com)
