ASCO makes noise level reduction the standard for dry ice pelletizers

*ASCO Carbon Dioxide Ltd. is continuously committed to maintain occupational safety at the highest level – including in the area of measurable reduction of noise emissions. To ensure an optimal working environment the specially designed insulations and housings are used from now on as standard for the «ASCO Dry Ice Pelletizer **P75i**» and «Dry Ice Machines **BP420i** & **BP425i**».*

Low noise emissions play a crucial role in the context of occupational safety. According to the World Health Organization (WHO), sustained exposure to noise can lead to hearing damage and increase the risk of workplace accidents. Dry ice producers who prioritize a quiet working environment not only contribute to protecting employee health but also enhance concentration and productivity. Therefore, the reduction of noise emissions is an essential component of a comprehensive workplace safety strategy, which is often underestimated.

To counteract this, ASCO Carbon Dioxide Ltd. has made the best possible noise reduction their new standard. This applies initially to the models «Dry Ice Pelletizer **P75i**» (750 kg/h, dry ice pellets in different sizes) as well as the «Dry Ice Machines **BP420i** and **BP425i**» (240 – 400 kg/h, automatic switch between block or pellets possible). They will now be delivered as standard with a low noise level of <79 dB(A). This is approximately equivalent to the noise of a vacuum cleaner at a normal distance.

About ASCO

The Swiss ASCO CARBON DIOXIDE LTD is a globally operating company that offers complete solutions for **CO₂ and dry ice**. The range of services includes **carbon capture plants, CO₂ recovery systems, ASCOJET dry ice blasting machines, dry ice production machines**, CO₂ cylinder filling systems, CO₂ vaporisers, CO₂ storage tanks, CO₂ dosing systems for water neutralization and various other CO₂ and dry ice equipment.

Thanks to this broad product range and more than 130 years of practical experience in the comprehensive **CO₂ and dry ice sector**, the customer benefits from individual, complete CO₂ solutions from a single source. ASCO has been part of the international industrial gases company Messer Group since 2007 and is its centre of competence for CO₂.
