

PRESS RELEASE

ASCO Inc. presents new dry ice blasting unit ASCOJET 1208

With the launch of the ASCOJET 1208, the US company ASCO CARBON DIOXIDE INC (ASCO Inc.) introduces a compact and easy-to-handle dry ice blasting machine, which is suitable for industrial applications.

The dry ice blasting unit ASCOJET 1208 impresses with a new modern frame design and self-explanatory pictograms. The 107 lb unit is easily carried to any place, thanks to the two large fixed rear wheels, as well as two lockable small front wheels. Housing and frame are made of robust powder coated steel. The newly integrated grounding roll and the pellet hopper's protective grating help guarantee even safer handling during the dry ice blasting process. Consumption rates for average dry ice volume and blasting pressure can be easily adjusted manually.

ASCO Inc. General Manager Zane Butler is completely convinced by the new ASCO dry ice blasting machine and explains: "This high-performance machine is characterized by its lightness. Thanks to the compact design, the ASCOJET 1208 is also suitable for more delicate cleaning work. Since dry ice blasting is a corrosion-free and non-abrasive process, even sensitive surfaces can be cleaned easily. The combination of high cleaning performance and relatively low compressed air consumption is an additional bonus."

The ASCO dry ice blasting technology has been successfully used in various industries for decades. Molds, tools, and machines can be cleaned by using ASCO dry ice blasting machines. In most cases, it is not necessary to dismantle the parts to be cleaned, which ensures shorter downtime and increased productivity during operation. "At ASCO we are always striving to optimize our portfolio of dry ice blasting machines for our customers. This allows us to offer the right blasting machine for every application. The market introduction of the ASCOJET 1208 is a further step towards completion of supply," Butler concludes.

About ASCO Inc.

ASCO CARBON DIOXIDE INC (ASCO Inc.) is the US subsidiary of the Swiss ASCO CARBON DIOXIDE LTD and was founded in July 2016. The office operates out of Jacksonville, FL – USA, and offers a wide range of powerful dry ice blasting and dry ice production machines. It provides complete individual solutions, comprehensive advice, e.g. optimal integration into the production process, dry ice logistics, including in-house dry ice production and noise control. Furthermore, the company invests in the construction of an active partner network in the US and Canada. This enables ASCO Inc. to ensure an optimal on-site customer care for US customers to benefit from ASCO's extensive knowledge. ascoco2.com
